FEATURES

AVM 26 is a simple, compact and reliable liquid ring pump capable to handle almost any gas mixture including vapors in vacuum or overpressure. The operating principle combined to its accurate design allow for severe duty with high tolerance of liquid carry over. The wide range of suction pressure (down to 33 mbar abs) makes the AVM series versatile and suitable for many industrial applications and more. The stainless-steel port plate and impeller are designed and manufactured with accurate process to reach outstanding and steady performance.

The low operating speed associated with the robust and simplified construction grant long service life with minimal maintenance. AVM26 is available in standard version or full stainless-steel AISI 316 (wetted parts). Other material options, on request.
